The Bermuda Giant Buttercup Oxalis.
A Fine Winter Flowering Pot Plant of Easy Culture.
This is not claimed to be a new variety,but a greatly improved form of Oxalis Cernuafrom Bermuda, where, through climatic con-ditions and congenial soil, it has attained greatstrength.

It is of such strong, luxuriant growth that one bulb is sufficient for a six-inch pot. Place in a dark, cool position for a few weeks to root thoroughly; then remove to a sunny situation with a temperature of about 60 degrees and the abundant bloom constantly produced for weeks will astonish you. They usually come into flower about six weeks from time of planting.

Each, . 05 cents ; dozen, 50 cents.

"Everything for Farm, Garden and Lawn."
Joseph Breck \& Sons, BOSTON, MASS.

WE AIM to awaken a greater interest in Horticultural and Agricultural Societies, and to increase the competition at their Exhibitions for the premiums offered.
WE HOPE that the enhanced value of the FIRST PRIZES - our offer, you observe, doubles each one - will result in the production of better specimens exhibited, through the planting of high-grade seeds and more intense cultivation $\cdot$ and that by demonstrating possibilities, stimulate gardeners, farmers and florists to raise better, and, therefore, more profitable crops.

WE BELIEVE that the Flower, Vegetable and Field Seeds and Flowering Bulbs offered by us are the best strains in the world, and we wish to encourage those who are not acquainted with our goods to ascertain it by experience.

If you obtain any FIRST PRIZES with the product of BRECK'S SEEDS OR BULBS, send us the Society's certificates of such prizes (which certificates will be re= turned to you) and write us that the seeds or bulbs were bought of us, together with any particulars of cultivation or other matters of interest, and we will, upon receipt of same, send you a sum equal to that awarded by the Society.

47 to 54 North Market Street,
46 Merchants Row, and
17 to 19 North Street,
BOSTON, MASS.

## This Example

## Of how our offer to duplicate First Prizes works in actual operation,

was selected from among the cases now coming to our notice. Messrs. Warren Heustis \& Son are included among Boston's most noted market gardeners: they have been kind enough to express themselves as highly pleased with our offer and the promptness with which we have fulfilled our promises.

The correspondence printed below tells the siory :
(COPY.)
Boston, July 31, r895.
Messrs. Warren Heustis \& Son, Belmont, Mass.: -
Gentlemen,- We acknowledge receipt of the seven certificates itemized below and in accordance with our offer to "duplicate all first premiums offered in 1895 by any Horticultural or Agricultural Society" in the United States, that may be secured with the produce of seeds or bulbs purchased of us, it gives us pleasure to hand you herewith our check for $\$ 21.00$, which amount duplicates the following first prizes awarded to you by the Massachusetts Horticultural Society, the seeds having been bought of us, viz. :

$$
\begin{aligned}
& \text { May 4th, I895, No. I 34, Spinach "Round Thick Leaf," . . . . \$3.00 } \\
& \text { June 6th, 1895, No. 16i, Radishes " Long Scarlet," . . . . . } 3.00 \\
& \text { June 6th, 1895, No. 163, Cucumbers "White Spine," . . . . } 3.00 \\
& \text { June 24th, 1895, No. 233, Beet "Egyptian" . . . . . . } 3.00 \\
& \text { June 24th, 1895, No. 235, Cucumbers "White Spine," . . . . } 3.00 \\
& \text { July 13th, 1895, No. 286, Cabbage "All Seasons," . . . . . } 3.00 \\
& \text { July 20th, I 895, No. 304, Lettuce "Black Seed Tennisball," . . } 3.00 \\
& \$ 21.00
\end{aligned}
$$

Allow us to congratulate you and hope that Breck's seeds will always be a source of profit and satisfaction to you. We return the certificates. Kindly sign and return receipt, for which we enclose stamped envelope, and oblige,
(Signed)

Yours resp'y,
Joseph Breck \& Sons, (Corp.)
\$21.00
(COPY.)
Received of Joseph Breck \& Sons (Corporation),
Twenty-one and $\frac{00}{00}$ dollars, being an amount equal to that awarded to us by the Massachusetts Horticultural Society for first prizes, as follows :

$$
\begin{aligned}
& \text { May 4th, 1895, No. 134, Spinach "Round Thick Leaf," . . . } \$ 3.00 \\
& \text { June 6th, 1895, No. 16i, Kadishes "Long Scarlet," . . . . . } 3.00 \\
& \text { June 6th, 1895, No. 163, Cucumbers "White Spine," . . . . } 3.00 \\
& \text { June 24th, 1895, No. 233, Beet "Egyptian," . . . . . . . } 3.00 \\

& \text { July 20th, 1895, No. 304, Lettuce "Black Seed Tennisball," . } 3.00 \\
& \$ 21.00
\end{aligned}
$$

The seeds from which these vegetables were raised were bought of you.

> (Signed) Warren Heustis \& Son.

Perhaps this will remind you of our offer and your opportunity, if you have bought seeds or bulbs of us this year. If not, you will know what to do another year.

 wonderful preparations which charm our senses with lovely colors and sweet perfumes, as soon as the
weather conditions permit: For example, take the crocus bulb in October, if you cannot dig one up in the garden, procure it from the seedsman; examine it and you will find its top covered with hard, white,pointed growths; dissect these and all its glory of March or April, in miniature, will be seen; the petals and stamens fully formed and surrounded with the tiny spear-like leaves. Set a few of these crocus bulbs in a saucer, with a little moss or cotton-batting as a foundation, and keep it constantly saturated with water, soon you will see the white points grow taller, swell, and presently burst, sending up the vaseshaped flower and pretty foliage. Thus is nature at work through all seasons, endeavoring to dispel gloom and brighten our lives and environments. The natural effort of the crocus to fulfil its mission when given reasonable conditions, is only a specimen of what may be expected from all the bulbs enumerated in these pages. A great many other sorts are as easily grown and flowered indoors during the dreary winter months, and the garden without, may, at little expense, be made to make spring as gay as June, if bulb planting is attended to in the autumn. Bulbs intended for flowering in the house can be potted when received, and placed in a cool cellar or outhouse ; a succession of flower will be obtained by bringing them, as wanted, into a room where the temperature averages $70^{\circ}$ during the day and about $50^{\circ}$ at night.

FOR OUT DOORS. The sooner after the begining of October that bulbs, intended for spring flowering out doors are planted, the finer will be the flowers, because they are enabled to make some root growth before severe weather sets in, and thus obtain food from the soil instead of exhausting themselves.

QUALITY is always a first consideration with us, therefore the bulbs we offer are all hand picked, and superior in every respect; compare them with other stocks.

PRICES have also received due attention, and are, in fact, much lower than high grade bulbs have hitherto been offered at, even without regard to our special offers, which see on page 3 of cover.

COLLECTIONS. For the convenience of those unfamiliar with the different varieties, we have made up a number of collections for both in and out door cultivation, see particulars on page 2 of cover; we will be glad to furnish designs and suggestions for bedding out to those interested.

EARLY ORDERS. While we can supply many sorts of bulbs up to Christmas, we recommend ordering early to secure first selection.

ILLUSTRATEDD descriptive catalogues and circulars of other goods handled by us mailed free on application.

WE INVITE correspondence on all subjects connected with horticulture and agriculture.

## HYACINTHS.

The Hyacinth is the most popular, beautiful and fragrant of Holland bulbs. It is of almost every imaginable shade of color, and is suitable alike for house or garden culture.

Pot Culture. - Plantings may be made at any time from September to December, though October is the best time. A light, rich soil with a mixture of well rotted cow manure, sand and leaf mould is most suitable, use a five inch pot and have the top of

the bulb just above the surface of the soil. After setting the bulb, thoroughly firm the soil and give a good watering. The pots should then be set away in a cool cellar or outhouse and covered over with coal ashes or some litter, for a few weeks, until the roots begin to grow; they may then be brought as wanted for a succession of flowers into a moderately warm light room.

Cu:ture in Glasses.- When it is desired to grow Hyacinths in water, they should be placed so that the base of the bulb merely touches the water. The glasses should then be set in a cool, dark closet, or in the cellar, until nearly filled with roots, when they may be brought into the light. Change the water frequently. Give as much fresh air as possible without letting the plants stand in a draught. It is of importance in growing Hyacinths in the parlor, that the atmosphere in which the plants are growing be kept moist, and as nearly as possible at a temperature of from sixty-five to seventy degrees.

Outdoor Culture. - The bulbs may be planted any time after the beginning of October and before the winter frosts set in. Any good, well-drained garden soil will answer. Dig deep, and mix in a little decomposed manure; set the bulbs from three to four inches below the surface, and about six inches apart; after the ground becomes frozen, give a good covering of stable litter. In spring, about two weel s after the flowers have faded, the bulbs may be lifted, cleaned, packed in a box of dry sand and stored away in a cool place until wanted again for planting in the fall.

## NAMED HYACINTHS.

## BRECK'S HAND PICKED BULBS

Are all of flowering age, thoroughly matured and the finest varieties in cultivation.

## WE INVITE COMPARISON.

Note.- As the single Hyacinths give the most satisfactory results, we always send a larger proportion of single than double, unless specially ordered to the contrary.

> Price for our selection of single and double sorts, all colors, splendid varieties, \$1.50 per doz.

## Early Roman Hyacinths.

This variety of the Hyacinth, a great favorite with all florists, may be had in flower by Christmas, when their fragrant flowers are most valuable for bouquets. They show to better advantage if four to six bulbs are planted in a pot.

White Italian Hyacinths, 5c. each, 50c. per doz., \$:3.50 per hun.

## Miniature Hyacinths for Jardinets, Fancy Pots, Etc.

These are similar to the ordinary Hyacinths, but diminutive, and are usually grown in sand or moss, like Crocuses; they look very nice when grown three or four together in pots.

## CHOICE UNNAMED HYACINTHS. Separate Shades and Colors for Bedding, Forcing, Etc.

Though without names, these are sound flowering bulbs of desirable varieties that attain about an equal height and bloom at the same time. They are likely to flower satisfactorily in either pots or beds and should not be confounded with the cheap mixtures frequently offered.

## FEED YOUR PLANTS WITH

## AND SEE THEII GROW.

It will impart health and vigor to feeble and stunted plants, changing their foliage from a sickly yellow to a rich dark green, strengthening the markings of variegated leaves, and greatly improving the flowers in number, size, fragrance, and richness of color.

It is a clean, odorless, dry powder, absolutely free from weed seeds or disease germs of any kind, containing all the essential elements of plant food in the form best adapted for use upon house plants.

Put up in two sizes of packages with full directions. No. 1. Containing sufficient food for 10 plants one year, retails at all first-class stores for 10 cts., or will be sent to any part of the United States by mail for 20 cts . No. 2. Containing sufficient food for 40 plants one year, retails everywhere for 25 cts., or will be sent by mail for 50 cts .

## all the Essex Fertilizers

of which there are various special kinds for specific crops, are manufactured by the same company that has made "LePage's Liquid Glue " a household word, and consumers may be assured their high standard of quality will always be faithfully maintained.

They are compounded under the direction of one of the best fertilizer experts in the United States, whose formulas are based on the latest discoveries of agricultural science, which have been verified by elaborate practical tests at the various State Experiment Stations and on many of the best farms throughout New England.

If you are interested in agriculture and want to keep up with the times, send for a free sample copy of

## "How to Raise Good Crops on a New England Farm."

It contains much valuable information concerning the latest fertilizers for all kinds of crops.

Russia Cement Co., Gloucester, Mass., U.S. A.

The perfect hardiness, ease of culture, varied markings, brilliant colors and in some cases sweet perfume make the Tulip as popular to-day as it was two hundred years ago when the mania for it, at any price, raged so furiously in Holland. They are effective and desirable even as single specimens, but it is when grown in masses that the best effect is produced.
Any good garden soil will do for the Tulip. When the soil is naturally poor a mixture of equal parts well rotted manure, well rotted sods or good loam or leaf mould may be applied. See that the drainage is good before planting, which should be done in October or November. Set the bulbs three and a half inches deep and five inches apart. A half inch of sand beneath the bulb is of essential benefit in preventing injury from excessive wet.
$V A N$ THOL TULIPS are the earliest and especially adapted for pot culture. The best effect is obtained by planting from six to twelve bulbs in a large pot.

The varieties marked ( $\dagger$ ) bloom simultaneously about twelve davs later than the VAN THOLS. This key will be useful in selecting for masses. Although nearly all the single early sorts will force to a certain extert, those marked (*) are the most suitab'. The kinds that have an (Ex:) prefixed are the finest for exhibition. The figures prefixed indicate the hevjit in inches to which each variety grows.

## Sweet Scented Tulips.

Add to the tulip, perfume, and what flower can compare with it ? There are only a few varieties that have a sweet fragrance, of which the three following are the most desirable. Plant a few once and you will never again think your bulb planting complete without them. Being single early sorts, they are as suitable for pot culture as for bedding.
Mr. Gladstone. Beautiful, clear canary-yellow, large cup-shaped flower, tea scented.
Per doz., 30 cts; per 100, $\$ 2.00$.
Prince Henry. Very large, fine shaped flower of a deep, orange color, overlaid with scarlet. Per doz., 40 cts . ; per 100, $\$ 3.00$.
McMahon. Bright orange, flaked with yellow. Large, beautiful and extra fragrant. Per doz., 30 cents.; per 100, $\$ 2.50$

## Unnamed Tulips.

## SINGLE, EARYY, SEPARATE COLORS.

These are first class bulbs of popular varieties that grow to the same height and bloom together. They are especially suitable for beds, borders and massing where effective contrast is desired.

## TULIPS.-Continued. <br> Single Early Mixtures.

BRECK'S SPECIAL. This mixture embraces not only all colors, but the best sorts that grow to about an equal height and flower simultaneously; it is without a rival for variety and brilliancy. Per doz., 20 cts.; per $100, \$ 1.50$; per $1,000, \$ 12.00$.
Single Early, first quality imported mixture. Per doz., 10 cts.; per 100, $\$ 0.75$; per $1,000, \$ 7.00$.

## Single Late or Florist's Tulips.

This very beautiful and interesting class flowers in May, considerably later than the other sections. They are of taller growth, and adapted for outdoor cultivation only.

This species has fringed flowers, brilliant crimson and yellow, with shades of bright green; very gay and effective in mixed borders, and forming a fine succession to the early flowering varieties.

Fine Mixed, all colors . . . . . . $15 \quad 1.00 \$ 9.00$

## Double Tulips.

The earlier varieties of this beautiful class of Tulips are admirably adapted for forcing. The later kinds are very effective for bedding, producing a dense mass of brilliant colors which remain in perfection a long time.

Note.-The words "early, medium and late," indicates the time of flowering of the different sorts.

## Tulip Species.

Each of the following are distinct species, blooming somewhat later than the single early Tulips and therefore valuable for mixed borders. They are very distinct in habit, and have beautiful and intense colors. Excellent for cutting.

## NARCISSUS OR DAFFODILS.

TYPES OF NARCISSUS.
(1) Horsfieldi; (2) Moschatus; (3) Poeticus Raduflorus; (4) Biflorus; (5) Bulbocodium; (6) Maximus.

We have the most complete coilection of Narcissus in America, and are in a position to cater to the wants of the public better than any house in the country.

Outdoor Culture. The Daffodil will grow in any ordinary garden soil and in almost any situation, but prefers moderately stiff, welldrained soil, in situations slightly shaded, such as the herbaceous border and the margins of flower-beds, along the outside edges of shrubberies, on woodland walks and on the margins of lakes and streams, or for naturalizing in the grass or wood land. Planting may be done in the fall any time before the frost sets in, October being the usual month for doing this. Once planted they should not be disturbed further than dividing and resetting in August once in three or four years when they get too crowded. The varieties marked " H " are hardy; those marked "HH" are hardy with a good covering of leaves or litter during winter; the kinds marked " T " are tender, and most suitable for growing indoors.

Pot Culture. It is unnecessary to say anything as to the merits of Narcissus of all kinds for this purpose, as their popularity is universal. At the head of the list stands the Tazetta, or Polyanthus Narcissus, with its large bunches of fragrant flowers. The Paper White (Dubius) and Double Roman Tazettas are very largely used for forcing. All the varieties of the group are suitable for this purpose, and most excellent for cut flowers. The Bulbocodium or Hoop Petticoat Daffodul, planted say 3 to 12 in a pot, is most unique and attractive, and the same may be said of the Cernuus or Noddinir Daffodil. The Campernelle or Large Jonquil (N. Odorus), and the Single and Double Sweet-Sceuted .Jonquils are splendid - the last-mentioned being exquisitely perfumed. Triandrus, the little Cyclamen Flowered Narcissus, is a perfect gem, one of the choicest things we offer. The Moschatus and other Spanis/2 Daffodils are also worthy of special mention. For culture, the hints given under hyacinths may be followed. One very important point is to keep them cool for the first four or five weeks when they are commencing to grow. After the roots are grown and the tops well started, they may be pushed forward more quickly in heat. In cutting for sending to friends or for market, the flowers should be cut in the bud, and when placed in water they will open out beautifully.

## NARCISSUS. - Continued.

Ard Righ, or Irish King. A magniticent Daffodil ; pure jellow, with the perianth elegantly twisted, and the trumpet widely r-flexed and fringed. H .
Bicolor. Golden yellow trumpet with white perianth; ten days later than Horsfieldi. H . .
Bicolor Emperor. Very large; trumpet golden yellow, perianth delicate primrose. H.
Hicolor Empress. Immense golden yellow trumpet, with a broad white perianth of great sub. stance. II
Bicolor Grandis. Color same as Morsfieldi, but a larger and later flower. II
Hicolor Horsfieldi (King of Daffodils; Large and stately; trumpet golden yellow, perianth white H. .
Biflorus (Primrose Peerless). Pure white perianth, with soft yellow crown; two flowers on each scape; late flowering. H . . . . .
Bulbocodium (Hoop Yetticoat). Rich yellow, small flower. HH.
Bulbocodium Citrinus. Pure sulphur-yellow; large, distinct, and beautiful. HH . .

## CHINESE NEW YEAR'S LILY.

## (Narcissus Orientalis).

No care whatever is required in the cultivation of this beautiful and interesting bulbous plant. Use shallow dishes about three inches deep, into which put about one inch of gravel. Set the bulbs on this and fill in with small stones or pieces of marble to keep them upright, and keep the dish full of water. These bulbs do not require to be put in the dark, but a little shading until the leaves begin to grow is beneficial. A customer of ours who has had great success with Chinese lilies, compared with others that have come to his knowledge, thinks that his having given them a pinch of wood ashes now and again, and when changing the water putting a few drops of ammonia into it, has largely ensured success. 10 cts . each ; $\$ 1.00$ per doz. ; $\$ 8.00$ per 100.

## THE SECRET OF SUCCESS.

## How to make your greenhouses and hot beds accomplish the best results.

Every gardener realizes the necessity of having his greenhouses so constructed as to positively exclude all draughts, and has found out by bitter experience that some small neglected chink will cause the death of more valuable plants, by admitting a frosty draught, than any of the other evils with which he is obliged to contend. This danger can be overcome completely if ordinary care is used in the construction of the house or bed.

To accomplish the most perfect results in buildings of this nature, Neponset Waterproof Red Rope Roofing Fabric is a good thing to be used in the construction of all such homes for plants. This fabric is absolutely waterproof, and is impervious to wind and dampness. It is cheaper than shingles or clapboards, and is, in addition, perfectly vermin proof. With all these good qualities in its favor, it is, furthermore, most easy to apply, the only tools which are needed being an ordinary knife and a hammer. The necessary nails and tin caps for applying this fabric are found in every package, and the cost of the same is $\$ 5.00$ for 500 square feet.

For buildings of every description it is perfection, taking the place of shingles or clapboards for out buildings, and the place of back plaster in dwellings.

Neponset Black Building Paper for inside lining is of the utmost importance. It is water and air tight, and vermin proof. Perfectly odorless, and far superior to tar paper.

## PROFITABLE HENS.

More profit, more eggs, less care, and less cost.
If the raisers of poultry would pay more attention to the manner in which their hens are housed, it would be unnecessary for them to spend the amount of money and time that they are continually obliged to give, in order to keep their fowl healthy and procure the best results. Fowl of every description are particularly sensitive to cold, dampness, and draughts. A hen that suffers from any of these causes cannot be made to thrive and lay well, no matter how carefully she is fed. Much better results may be obtained in every instance by keeping them warm from the outside, than is obtainable by the use of heating hen-food mixtures.

In the construction of hen houses, Neponset Waterproof Red Rope Roofing Fabric should be used on the outside in place of shingles. This will ensure a building that is absolutely free from cold draughts and dampness, and will be in addition free from vermin. Red Rope Roofing Fabric can be bought for $\$ 5.00$ for 500 square feet, which includes the necessary nails and tin caps. It can be put on by anyone with the aid of a jack knife and a hammer, and the results obtained from its use are far beyond those obtained from the use of shingles as can be imagined.

In dwelling houses this will take the place of back plaster, and in connection with it Neponset Black Building Paper should be used for inside lining, which is absolutely water and air tight, and vermin proof. It will pay anyone intercsted in building, no matter what, to investigate these fabrics fully.

# Neponset Waterproof Fabrics 

Everything considered, there is no class of hardy flowering plants so desirable as the Lily family. Their cultivation is not difficult, nearly all of the varicties beingi hardy and flourishing in ordinary garden soil. We

LILIES.
 recommend deep planting, from six to twelve inches, according to the size of the bulb and depth of soil. When it is practicable to obtain peat,orleaf mould and sand in which to grow them, better results will follow.

## THE GRAND NEW LILY.

## LILLIUM WALLACHIANUM SUPERBUM.

"The variety Superbum of the Indian Lily is much superior to the type both in vigor of constitution and in the size and beauty of its flowers." - Garden and Forest, Aug. 27, 1890.

This is beyond question the most beautiful of all the Trumpet Lilies, the flowers being of purest white, the tube being about ten inches long and shaded a most lovely primrose yellow at the base. As exhibited for the first time in this country by Mr. H. H. Hunnewell and Mr. W. C. Strong, the following description is given by the Flower Committee of the Massachusetts Horticultural Society in its Report for 1891: "It is a magnificent Lily, with an immense funnel-shaped flower with solid texture, and beautiful in color, which is white shaded with chocolate on the outer side and delicately tinged with yellow on the inside. It was awarded a firstclass certificate."

Strong flowering bulbs ready for delivery about Oct. 15.
Price, each, first size, 75 cents; second size, 50 cents.
Price, per doz., first size, $\$ 8.00$; second size, $\$ 5.00$.

Following are the usual dates at which we make delivery of the different varieties of Lilies.

Hurrisi, Longiflorum, July 15; Candidum, Aug. 1; Tenuifolium, Wallacei, Pardalinum, Dalmaticum, Chalcedonıcum, Canadense, Aug. 15̃; Auratums, Speciosums, Testaceum, Davuricums, Elegans, Atrosanguineum, Aurca Maculatum, Philadelphicum, Browni, Croceum, Martagrum, S:pt. 15 ; Concolor, Krameri, Vittatum, Parryi, Batemanie, Hansoni, Humbolti, Leichtlinii, Monadelphum, Nov. 1.

Pot Culture: - The best compost to use is loam and peat in about equal parts, with the addition of a sprinkling of sharp sand and powdered charcoal. Select a large-sized pot, say an 8 or 10 -inch, so as to allow of deep planting, a most essential matter where there are upper roots to be protected. Dust a little charcoal about the bulb to keep it fresh, and cover at least two inches with soil. Water lightly until the shoot begins to appear; never apply liquid manure of any kind unless as a stimulant when just about to flower. Among the varieties worthy of special mention for growing in pots, we would notice particulaily, Auratum, Speciosum, Longiflorum, Harrisi, Tenuifolium and Candidum. Other excellent sorts for pots are Browni, Kra. meri, Chalcedonicum, Batemani, Wallacei, Monadelphum, etc.

Book on Lilies, We are often asked, "What is the best treatise on Lilies, that is reliable, practical, and moderate in price?" We know of nothing better than Notes on Lilies, by Dr. Wallace: a very complete work on this favorite class of plants, giving exhaustive cultural instructions, notes from collectors and cultivators in all parts of the world, together with descriptions and illustrations of the plant and bulb growth of every known variety. A reliable guide for beginners. We can supply copies of this work (which we have imported direct) at the very moderate sum of $\$ 2.00$ each.

## LILIES.-Continued.

Auratum. (Golden Rayed Lily of Fapan). Ivory white ground, thickly strewn with pur. ple studs; the centre of each petal has a band of light golden yellow extending from tip to base. The most magnificent of lilies.

## Each <br> Doz.

Auratum Rubrum-Vittatum. In this form of Auratum, the band is crimson instead of yellow and the blotches are large and chocolate brown in color. .
1Batemannize. Clear orange apricot, without sp ts, six to etght flowers borne of a stem 4 feet high. .
Browni. Trumpet shaped flowers ten inches in length, interior pure white with chocolate colored anthers, exterior brownish purple, height 3 feet.
Canadense. (Canadian Bell-Flowered Lily). Color varies from reddish orange to yellow, thickly marked with black spots, height 3 to 4 feet. .
Candidum. (The Madonna Lily). (White Garden Lily). Pure white, good for both pot and garden cultivation, height 4 feet
Chalcedonicum. Beautiful, deep scarlet, height 3 feet
Concolor. Fiery, scarlet flowers, faintly spotted with black, height 2 feet
Croceum Large umbels of orange colored flowers, thickly spotted with black, height $\dot{3}$ feet
Davaricum Erectum. Flowers scarlet, shaded with yellow, produced in umbels of eight to ten on each stem, height 3 feet. (Synonyms, "Umbellatum" and "fulgens")
Davuricum Grandifiorum. Crimson, passing to orange, very large flowers, height $\dot{3}$ feet.
Nlegans Atrosanguineum. Rich, blood crimson, spotted with black, height 2 feet
Elegans Citrinum. Beautiful, light yellow flowers, height 1 foot.
Harrisii. (The Bermuda Easter Lily). Said to be a form of the Longiflorum, but grows taller and is more floriferous, pure white and very fragrant, height 3 feet.

Extra ${ }^{\circ} \mathrm{Size}$,
Hansoni. Outside yellow, streaked with white, inside, bright yellow spotted with purple, height, 3 feet
Humbolti. Rich, golden yellow, freely spotted with crimson-purple, the tips are beautifully re-curved, height 6 feet

Leichtlinii. Pure canary-yellow with crimson spots, height 3 feet

保 black, height 4 feet
Monadelphum Szovitzianum. (Synonyms, "Colchncum,""Szoovitzianum"). The flowers vary in color from deep golden-yellow to clear primrose, spotted more or less with black, height 3 feet
ardalinum. Bright orange-scarlet, shading to orange, freely spotted with maroon, height 6 feet
Parryi. Clear, lemon yellow with small purple duts at the base, very fragrant, height 3 fect.
Hhiladelphicum. Bright red with black spots, heisht 3 feet
Speciosum Rubrum. (Synonym, Lancifolium Rubrum). White, heavily spottcd with rich crimson, hei„ht 3 feet
. 60

Speciosum Rubrum Melpomene. The darkest of the Speciosum group, white, heavily spotted with dark crimson, height 3 feet
. 30

Speciosum Roseum. White, stained and spotted rose, height 3 feet
Speciosum Aloum Large, white flowers
ning through the centre of each petal, height 3 feet
Superibum. Yellowish red, height 4 feet . . .
Tenuifolium. (Coral Lily of Siberia). One of the earliest, forces readily, twelve to twenty fiery, scarlet flowers borne on slerder stems, height 18 inches
$20 \$ 2.0$
Testaceum. (Synonyms, "Excelsum," "Isabellinum )." Very fragrant, apricot-colored flowers, height 5 feet
Tigrinum Splendens. (Tiger Lily). Fiery scarlet flowers, spotted crimson, the best of the tiger lilies, height 6 feet
Tigrinmm Flore Pleno. Double-flowered, orange, spotted black, height 3 feet .

Each Doz.

Wallacei. Glowing apricot, freely spo:ted with black, a magnificent variety, very distinct and effective, height 3 feet . $\qquad$

## Lily-of-the-Valley.

## (CONVALLARIA.)

This favorite flower is perfectly hardy and does well in any moderately moist soil. When forced, the roots must be firmly planted, and the crowns well covered with soil or moss at first.
Berlin Single Crowns or Pips, Per doz. .25, per 100, \$1.50 Clumps, imported, lirge and fine. Each, .30, per doz. $\$ 3.50$

## FARTM-P○ULTRY.

THE DEMAND for choice market poultry in the form of chickens for broilers, roasters, fowl, ducks, turkeys, and eggs, is every year increasing. The average price in the large markets rules high the year around. The demand for "good " poultry and "fresh" eggs is not supplied by the raisers of this country, and will not be for years to come. Prices are steadily increasing year after year.

THEREFORE, why do you not give more attention to poultry raising? You may answer, "Oh! there is no profit in it here." Yes there is "here" or anywhere if rightly done. "Scrub"" poultry, poorly prepared for market, and stale eggs, like all other second grade goods, will always sell slow in the market.

THAT BEST of all poultry papers, FARm-Poultry, published by I. S. Johnson \& Co., Boston, Mass., has done, is doing, and will continue to do very nuch to teach every persoa who reads it carefully and practices its teaching, how to raise poultry for profit, because all the matter that goes into it is the result of actual experience by the editor on a poultry farm. Upon this farm is being done every year just what Farm-Poultry can and will teach you, if you study its pages every issue. It is a practical instructor; it is a helpful friend and aid; it is to the beginner an ever ready reference and guide to success.

## It Teaches You How to dress and market poultry; How and when to hatch chickens; How to bring the pullets to early laying maturity; How to prevent and cure all chicken and poultry diseases How to build the best and most economical houses and yards; How to make hens lay most eggs at season when prices are high. Do you care to learn how others make their hens pay $\$ 2,50$ each per year? Then subscribe to Farm. Poultry. "What has been done, can be done again." Remember the price; one year, $\$ 1.00$; sample copy, 2 cts. <br> I. S. JOHNSON \& CO., 24 Custom House St., Boston, Mass.

# GENERAL ALPHABETICAL LIST 

# BULBS AND ROOTS. 

Those marked with a star (*) ripen late, and cannot be sent out before the end of November.

Formosissima.

Vittata.

Zeyphranthes Treatea.

## AMARYLLIS.

$B^{0}$ULBOUS plants with large drooping, bell-shaped, lily-like flowers, varying -n color from the richest crimson to pure white, striped with crimson or scarlet. The Vittata Hybrids are magnificent pot plants, thriving well in an ordinary parlor. They should be in every collection. None of them will stand the winter out of doors, but some of them may be planted out in May and will flower quite freely during the summer months. As pot plants for parlor and conservatory decoration during winter, they are probably unsurpassed by any other genus.

Brilliant and attractive flowers, embracing every shade of crimson, scarlet and white; mottled, striped and splashed in every conceivable manner. Per doz., 20 cts.; per 100, \$1.50.

## *SPIRÆA OR ASTILBE.

Each. Doz. 100
Japomica. A perfectly hardy herbaceous plant. From the dark green cut leaves arise numerous crowded panicles of feathery white flowers. It is largely grown for forcing in pots, and is splendid for cutting (Naponica Grandiflora (Nezv Large Flowering). This variety resembles the foregoing
but the flowers are much larger, of the purest white, and stand well above the foliage in
airy sprays ...... ( Special offer $\dot{N}$ o 2 . only applies on Spircea).

## TROP ÆOLUM.

Plant in pots, use a light, rich soil, with plenty of drainage; just cover the tubers, and when started keep up a vigorous growth; a ten or twelve inch pot will be required for one bulb.

## TRILLIUM (Wood Lily).

One of the most effective of our early spring flowering perennials; perfectly hardy, and will grow freely in any cool, shady flace.
Trillium Grandiflorum (The Wood Lily). White
Each, 12 cts.; doz., $\$ 1.40$

## TRITONIA.

Plant four or five bulbs in a pot six inches in diameter, and cover them one inch deep. Cultivate the same as for Ixias.
Tritonias. Fine mixed varicties
Each 4 cts. ; doz., 40 cts.

## TRITELIA UNIFLORA.

A charming spring flowering plant, growing about six inches high, producing large flowers on slender stalks. Increases rapidly, and can be used advantageously for lines, edging beds, or in clumps on the rockery or borders.
Uniflora. Pure white, blue shaded . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 15 \$1.00

## NEW BOOK ON BULB CULTURE.

By C. L. ALLEN.

Handsomely Illustrated and Well Bound. Prlce \$2.00.
This is the only really practical, low priced work on Bulbs and Tuberous-rooted plants, published in America.

It contains their history, description, methods of propagation, and complete directions for their successful culture in the garden, dwelling and greenhouse.

On orders for Bulbs amounting to $\$ 10.00$ or over, catalogue prices, we give a copy of this book free.

If you have, you can't afford to be without that wonderful new liquid vegetable discovery,

## VETERINARY X-ZALIA.

A positive discovery for the cure of Galls, Scratches, and Surface Inflammations of every description. Superior to the old ointments, in as much as it, being of the consistency of water, cleanses thoroughly when applied, freeing the wound from dirt instead of causing irritation by grinding it in, as is the case when grease is used, and at the same time, by its penetrating and great curative properties, it in every instance

## HEAIS.

Purely vegetable, contains no alcohol or poisonous ingredients, may be applied to a raw surface or even poured into the eye of an animal without causing a particle of pain. Invaluable as a preventive of stiff or sore muscles, when used diluted, as a wash after exercising. Endorsed and used by Col. Wm. F. Cody, Hon. Warren F. Daniell, of Franklin, N. H., and scores of other prominent owners of racing and stud stables throughout the country.

## LARGE BOTTLE, \$1.25.

## X-Zalia Medicine Co., Boston, Mass

雨 We have thoroughly tested Veterinary X-Zalia, and believe it to be the best article of its kind in the market. We carry it in stock, and will fill orders promptly at above price.

## ENSURE A BEAUTIFUL LAWN BY USING BRECK'S LAWN GRASS SEED.

Breck's Lawn Grass Mixture has many imitations but no equal.

## Sow in Spring or during August and September.

We have given much thought and made many experiments in order to ascertain just what is the best mixture for permanent lawns, and the grasses which are best suited to this climate. By the proper blending of the varieties which constitute Breck's Lawn Grass, we have obtained a mixture that from early spring to late fall will give to lawns made with it that rich, deep green so - often admired upon the lawns and parks of England, but so seldom seen in this country.

## BRECK'S LAWN AND GARDEN DRESSING.

Don't make a barnyard of your lawn, but use our Lawn Dressing.

## "DAISY" GREEN BONE CUTTER.

## Best in the world. Send for testimonials.

This machine is especially made for cutting GREEN BONE with meat on, right from the butcher, or offals of bone and meat from the table; also cuts vegetables, scrap cake, etc. A glance at the illustration shows at once the principle on which the Cutter works. The knives can be taken out when dull, sharpened and replaced in a few minutes. A Lakge or Small Bone can be cut up at once. Very little pressure on the lever is required. The cutter is always ready for work. Turns easy, cuts fine and fast. It is simple in construction, nothing to get out of order. Can be turned by hand, or by power by runninga belt on hand wheel. Capacity, by hand, $\frac{1}{2} \mathrm{lb}$. per minute; by power, about 60 lbs . per hour.

WILSON BROS., Sole Manufacturers, EASTON, PA.
We can furnish Daisy Bone Cutters at the following prices, subject to our special offers, viz. : With stand, $\$ 18.00$; without stand, $\$ 15.00$. JOSEPH BRECK \& SONS (Corporation).

## GRASS SEEDS FOR FALL SOWING.

PRICES SUBJECT TO CHANGE.

## CHOICE FLOWER SEEDS FOR FALL SOWING.

FOR the winter decoration of the parlor and greenhouse, many kinds of flower seeds may be sown in the fall. This plan is also advisable for hardy perennials that do not flower until the sccond season, unless sown very early in the spring. If sown early enorgh in the fall, they will give plants, that with a little protection, will be strong enough to stand the winter, and give very early flowers. Several kinds of hardy annuals may also be sown for early spring flowering, and a sowing may be made of all kinds, suitable for winter growing in the parlor or greenhouse.

## HYACINTH GLASSES.

Special Offer No. 2 on'y applies to Hyacinth Glasses.

## PLANT DEPARTIIENT.

To this important branch of our business we are giving much attention, and are in a position, second to none, to supply Fruit Trees, Shade and Ornamental Trees, Evergreen and Flowering Shrubs, Vines, Herbaceous and Summer Bedding Plants, etc., in all desirable varieties and sizes at lowest prices. We shall be glad to advise intending buyers as to selection, and also furnish plans and estimates for laying out and planting ornamental grounds.

Herbaceous Plants, Ornamental Shade and Fruit Trees, grapevines, currants and small fruits of all kinds get a better start if planted out in the fall; and we should advise all who can to order as soon as possible. For complete list see our spring catalogue. Mailed free on application.

## HARDY HERBACEOUS PERENNIALS.

These valuable plants combine perfect hardihood with an ease of culture in all gardensoils and a prolific supply of bloom. All are of the highest value as border plants and once obtained will increase in size and flower effect yearly. The following 25 sorts have been selected from a list of over 1500 varieties and can be justly recommended as the cream of Hardy Perennials.

The common name is given in parenthesis followed by the height to which the plant ordinarily growes, its season of bloom indicated by the number of the month and this followed by its native country.

The set of 25 varieties for $\$ 5.75$.

Anemone Sylvestris (Snow Drop Anemone). 9 in., 4-\%. Asia. Large, cup-shaped, pure white flowers on clean stems, and held well above the neat, handsomely cut foliage. One of the most satisfactory plants for the border, an 1 equally at home in partial shade. Naturalized in the grove or in the rockery. 25 cts .
Anthemis Tinctoria (Hardy Golden Marguerite). 2 ft. , 7-9. Europe. A plant of dense bushy habit, completely covered with heads of showy yellow flowers all summer. Will succeed in even the poorest of soils. 15 cts .
Aquilegia Munstead White (Munstead White Columbine). 2 ft ., $5 \%$. Handsome broad lightgreen foliage and showy, dense-flowered heads of large, pure white flowers. Very distinct and invaluable for cutting. One of the choicest flowers in our entire collection. 30 cts.
Arabis Albida (Mountain Rock-Cress). 6 in., 4-6. Caucasus. Pure white flowers with the fragrance of May flowers, borne in ciose heads on leafy stems, and in such profusion as to completely hide the foliage. Very choice, 20 cts .
Aster Longifolia Var. Formosissima. 15 in., 7-9. America. Dwarf, dense habit, and the bush completely enveloped in the clouds of starry, deep rose-purple flowers. 20 cts.
Bolionia Latisquama. 4 ft ., 9-10. America. Pink, slightly tinged with lavender. Unsurpassed among hardy plants for the border. 25 cts.
Campanula Carpathica (Carpathian Hairbell or Bellflower). 9 in., 6-9. Austria. Dwarf tufted habit. Flowers deep blue on good stems for cutting, and borne in continuous succession throughout midsummer. One of the choicest plants for the front of the border, used for edgings, for summer bedding, or in the rockery. 25 cts.
Centranthus Ruber (Red Valerian or Jupiter's Beard). 2 ft ., 6-7. England. Showy spikes of deep-crimson flowers. 25 cts.
Coreopsis Lanceolata. 2 ft ., $6-10$. America. Deep golden-yellow flowers on good stems for cutting. 20 cts .
Delphinium Formosum. 4 ft., 7-9. Large, deepblue flowers with white eyes and in showy, long spikes. One of the choicest. 25 cts .

Doronicum Plantagineum Var. Excelsum. 2 ft ., 4-6. Europe. Showy, deep orange-yellow flowers, borne in the greatest profusion, and each from three to four inches across. One of the finest of Hardy border plants. 25 cts.
Epimedium Alpinum (Rubrum). 15 in., 5-6. England. Long, showy panicles of handsome red and white flowers. 25 cts.
Erigeron Speciosus (Stenactis Speciosus). 2 ft ., 6-8. California. Fine bushy habit. Handsome, large, violet-blue flowers, with finely cut petals and bright yellow centres. A first-class plant in every way. Splendid for cutting. 25 cts .
Funkia Grandiflora (Subcordata) (Corfu Lily). 18 in., 8-10. Japan. Showy, heart-shaped, lightgreen foliage and clusters of fragrant, pure white flowers, Dorne in constant successi on for several weeks. One of the choicest of all hardy plants. 25 cts .
Helianthus Maximiliana. 8 ft , 10-11. Minnesnta. An elegant species. The latest bloomer of its class, as well as one of the largest of all flowers. The flowers are of a clear yellow, varying from 4 to 6 inches across, with several rows of petals and a very full centre. Handsome in either bud or flower.
Hemerocallis Flava (Yellow Day Lily). 2 ft., 5-7. Siberia. Clusters of briglit-yellow fragrant flowers. One of the choicest of hardy plants. 20 cts .
Hibiscus Californicus. 5 ft., 8-10. California. Very showy foliage and handsome creamy-white flowers, with deep-crimson centre, each flower 5 to 7 inches across. Forms a bush as wide as it is tall, and during its blooming season no plant is more effective. 35 cts.
Linum Perenne (Perennial Flax.) 18 in., 6-9. England. Clear blue flowers. 20 cts.
Lychnis Vespertina Var. F1. P1. (Double White Campion.) 2 ft ., 6-10. Siberia. A stout growing, bushy plant, with oval foliage and clusters of purest white, very double flowers, with a charming odor in early evening. A plant of highest value for cutting purposes. 25 cts.

Pentstemon Digitalis. 3 ft ., 7-8. Pennsylvania. Large spikes of long, pure white flowers, with purple-spotted throats. 20 cts .
Phlox Miss Lingard. Pure white, with distinct lavender eye; tall cylindrical spikes. A constant bloomer; very fine. 25 cts.
Sedum Spectabile (Showy Stone-Crop). IS in., 9 11. Japan. Effective, broad, oval, light-green foliage, and immeuse, showy, flat heads of handsome, rose-colored flowers. A fine border plant, forming a broad bush and one of the best plants for foliage or flower effect in our collection. Quite indispensable as a late blooming plant. Fine for massing. 25 cts .
Silene Virginica (Fire Pink): 9 in., 6-8 America. A handsome, low-growing plant, with neat foliage, and in late June and early July, and again in late autumn, produces showy clusters of large, intense, crimson-scarlet flowers, giving one of
the most gorgeous effects possible. A plant of the highest merit. 25 cts .
Veronica Longifolia Var. Subsessilis. 2 ft., S.10. Japan. The choicest of the larger-growing species of the class, forming stout clumps, with showy foliage, and from early autumn until hard frost producing a constant succession of long, handsome spikes of the deepest, brightest blue, each spike lasting on the plant a long time. There is no finer plant in our entire collection than this, and none with richer-colored flowers borne more freely or better adapted for rich color effect in the garden, or more satisfactory for cutting. Should be in every garden where beautilul flowers are sought. $\quad \mathbf{2} 0 \mathrm{cts}$.
3 pirxa Palmata. 3 ft ., 6-S. Japan. One of the finest perennials in cultivation, with elegant palmate foliage and a succession of showy, large heads of deep-crimson flowers. Should be in every col. lection. 30 cts .

## HARDY FLOWERING SHRUBS.

Almond (Prunus fap. Rubra f.pl.). Double pink flowers. Large plants, 50 cts .
Almond (Prunus fop. Alba fi.pl.). Double white flowers, beautiful. 50 cts .
Althrea purpurea plena (Rose of Sharon). Hibis. cus. 35 and 50 cts. each.
Azaleas. Ghent Hybrids, perfectly hardy, and of many brilliant colors. Fine plants, $\$ 1.00$; large sizes, $\$ 2.00$ and $\$ 2.50$.
Azalea Mollis. A new type, flowering earlier than the Ghent, and in color and form approaching the Indian varieties. 75 cts . to $\$ 1.00$ each.
Barberry (Berberis Thunbergii). A low growing shrub of arching habit; the foliage changes to many brilliant colors in the fall. Strong plants. 50 cts. each.
Calycanthus Floridus. Strawberry tree or sweet scented shrub, dark flowers. 50 cts.; small plants, 25 cts.
Cornus Elangantissima. With variegated foliage, the leaves are marked with silvery white, very attractive. 50 cts. each.
Deutzia Gracilis. Compact, filled with starry white flowers. 35 and 50 cts, each.
Deutzia Crenata f1. pl. Flowers double white, tinged with rose. 35 and 50 cts. each
Elder, Golden. Very effective for its bright-yellow foliage. 25 and 50 cts . each.
Exochorda Grandiflora. A choice shrub of strong upright growth, producing a profusion of large, snowy-white flowers in June. 50 and 75 cts. each.
Forsythia Suspensa. Trained as a stindard, it becomes one of the most beautiful weeping shrubs, covered with bright golden-yellow blos.
soms early in summer. Dwarfs, 25 and 50 cts. each.
Hydrangea, Paniculata Grandiflora. Flowers white in great pyramidal panicles, about a fuot long. $50 \mathrm{cts}, 75 \mathrm{cts}$. and $\$ 1.00$ each.
Kalmia Latifolia. A choice native evergreen shrub with shining foliage, and dense clusters of pink or nearly white flowers. $\$ 1.00$ to $\$ 1.50$ each.
Lilac (Syringa). Common bluish-purple flowers. 25 and 50 cts . each.
Lilac (S. Alba). Pure white. 25 and 50 cts. each.
Mock Orange or Syringa (Philadelphus). Of com. pact habit, with creamy-white flowers, deliciously fragrant. 35 and 50 cts.
Pyrus Japonica (Cydonia). Japan Quince, flowers bright scarlet, very showy. 25 and 50 cts. each.
Rhus Cotinus. The well-known smoke bush. 3 ft ., 25 cts.; 5 ft ., 50 cts . each.
Spiraa Aurea. Frequent pinching produces a deep golden-yellow color. 35 and 50 cts. each.
Spiræa Thunbergii. Dwarf, flowers early, very pretty. 35 and 50 cts. each.
Spiræa Van Houtti. The most profuse flowering of all the Spiræas, the bush being a mass of white bloom. 35 and 50 cts each.
Sinowball (Vibernum Plicatum). A great improvement on the old-fashioned sort, with dark green foliage, and superb trusses of white flowers in midsummer. 50 and 75 cts. each.
Weigelia Rosea. Well known, very free-flowering. 35 and 50 cts. each.
Weigelia Lowii. This variety has dark crimson flowers with white stamens, very free-flowering. Strong plants. 50 cts . each.

## HARDY CLIMBING PLANTS.

Actinidia Polygama. A strong, clean vine from Japan. 50 cts, each.
Ampelopsis Quinquefolia (Virginia Creeper). 25 cts. earh.
Ampelopsis Veitchii (Boston Ivy). Grows rapidly and clings to a wall or fence, with the tenacity of ivy. 25 cts. each; $\$ 2.50$ per dozen.

Begonia Radicans (Trumpet Vine). 25 and 50 cts . each.
Honeysuckle, Hall's Japan. 35 and 50 cts. each.
Wisteria Chinensis. White or purple, either 50 cts. to $\$ 1.00$ each.

## RHODODENDRONS.

We draw our supply of Rhododendrons from what we believe to be the finest stock in the world. All the plants, even the small sizes, are symmetrical in form, well furnished, and have good fibrous roots that make tfansplanting comparatively safe.

## PRICES.

Good Plants, 18 to 20 inches, budded, $\$ 1.00$; per hundred, $\$ 85.00$. Strong Plants, 20 to 24 irches, budded, $\$ 150$; per hundred, $\$ 1: 25.00$. Extra Plants, 24 to 30 inches, budded, $\$ 2.00$; per hundred, $\$ 175.00$.

For description see our Annual Seed Catalogue.

## SHADE AND ORNAMENTAL TREES.

Ash, American White (Fraxinus Alba). 10 ft ., 75 cents ; $12 \mathrm{ft} ., \$ 1.00$.
Ash, Mountain (Sorbus Americana). $6 \mathrm{ft} ., 50$ cents ; $9 \mathrm{ft} ., \$ 1.00$.
Beech, American (Fagus Fernginea). $5 \mathrm{ft} ., 50$ cents ; 7 ft ., $\$ 1.00$.
Beech, River's Purple ( $F$. Atropurpurea). $2 \mathrm{ft} .$, $\$ 1.00 ; 4 \mathrm{ft} ., \$ 1.50$.

Moore's Early. A large, early, and handsome grape. Has all the good points.
Niagara White. The vine is remarkably hardy; bunches very large. Ripens with the Concord. It is enornously productive.
The above Hardy Grapes are all strong, healthy, two-year vines. Per vine, 50 cents; one year, 35 cents; except where noted.

## STRAWBERRY PLANTS.

Strawberries may be planted either in spring or fall. Many prefer to set out potgroz'n plants after the middle of August. The plot to be planted can be cropped with vegetables until that time, and the young Strawberry plants, having the advantage of fresh manure and cultivated soil, will the following season produce as large fruit as can be obtained from setting layered plants the previous spring.

Those marked $(P)$ are pistillate, and will not fruit alone, but should be planted beside some perfect flowered variety.

We offer the following standard varieties:-
Marshall. The King of berries. It has been awarded first prize against all comers, wherever shown, since its introduction. Per dozen, 75 cents; per hundred, $\$ 5.00$.
Leader. This wonderful, early large size and fine quality berry has attained great popularity since its intro. duction by us three years ago. We recommend it as ihe best early sort.
Belmont. One of the best kinds in cultivation. The berry is large, crimson in color, oblong in shape, very solid, siveet, and of extra flavor; an excellent carrier and keeper.
Bubach No. $5(P)$. A very vigorous grower and valuable kind for market; large, productive,firm and good quality; season early to medium.
Beder Wood. One of the best early varieties, immensely productive of large, conical-shaped bright red fruit; quality excellent.
Haverland ( P ). This variety succeeds everywhere. Fruit large, light red in color, and of good quality.
Jessie. A fine companion for Bubach No. 5, flowering at the same time. Good shape, fine color, ifipening evenly, and very firm.
Parker Earle. A robust and productive variety bearing scarlet, crimson colored fruit of good size and quality. The above sorts, except as noted, $\$ 2.50$ per $100 ; \$ 20.00$ per $10 C 0$.

## Female Mercantile Department

Supplies approved Female Bookkeepers, Cashiers, Stenographers, Saleswomen, Young Ladies for Office Work, etc.

When this Bureau was established in 1890 our purpose was to secure to employers a better class of help than they had been obtaining.

How well we have succeeded is shown by the rapid growth of this Department of our business, and the many voluntary statements received concerning its convenience and the high grade of employees furnished,

We mail free on application circulars descriptive of our Bureau and blank forms whereon employers can state particulars necessary to guide us in selecting suitable employees.

Our Bureau of Registry and Information has certainly improved and elevated the service and we believe it will continue to do so, besides supplying a longfelt want.

We take this opportunity to thank our customers for the business given us and to assure them that our Bureau was never so well prepared to serve them as now; those who have not as yet patronized it are invited to do so, and give us an opportunity to practically demonstrate the benefits to be derived from its use.

Yours respectfully,

A Great reduction IV PRICES F0R 1895.6

One extra share given with each plow.
Beware of imitation plows and cxtras, claiming to be the genuine Oliver or cqually good. The genuine plows and repairs, direct from the factory, are for sale in New Englatud only by us and our authorized agents. All others are spurious, and cannot be relied upon to fit well or do good work.
Sole New England Agents, JOSEPH BRECK \& SONS (Corporation), 47 to 54 North Market Street, Boston, Mass.

In this series the Latch is operated by the foot. By this arrangement, which is both simple and durable, the plow is ready for work soon as reversed without taking the hands from the handles or stopping the team.

A great improvement is the attaching the Foot Latch to take back part of the Standard, so the handles can be removed for shipping, without disturbing the Latch.

Aquapult Spraying Force Pump. Net price, $\$ 4.50$.

## W. E. B. DOUGLAS,

Manufacturers of a great variety of

## SPRAYING PUMPS.

The Aquapult is made of brass, portable, and is the best pump in the market for spraying plants and shrubs. For grape vines the Knapsack Sprayer is conceded the best. Send for circular descriptive of Spraying Pumps.

Factory, Middletown, Conn.
Branch Warehouses.
85 and 87 John Street, New York. 197 Lake Street, Chicago, III.

## BANNER ROOT CUTTER.

For cutting up all kinds of Roots and Vegetables for Stock Feeding. Capacity, 30 to 50 bush. per hour.

The only machine that cuts in Long, Thin, Half-Round Slices. The only Root Cutter with a Self Feeding Device.

We wish to call attention of farmers and stock raisers to the machine illustrated above: For the cutting of all kinds of roois and vegetables for stock feeding. It is a strong, substantial machine built on correct principles for the purpose intended. We claim it to be the (asiest running and most rapid cutter for this class of work ever invented.

HAND CUTTER, list price, $\$ 12.00$; net price, $\$ 11.00$.
Price of POWER CUTTER and circulars on application.

## ALL POULTRY NEED SHARP GRIT.

It is all iron except the handle. Weight, about 18 pounds.
A pressure of 50 lbs on the handle exerts a crushing pressure of 10 tons in the machine. Will crush Granite and Marble, Chips, Gravel Screenings, Old Dishes, Oyster Shells, Brick-Bats, or anything Hard and Brittle, not more than 1 inch thick and 2 inches wide. Will crush either Fine or Coarse, By simply working the handle high or low.

#  

I'atented Augist 11, 188.5.

Our Screens and Weather Strips are the best in the world. You cannot afford to be withont them.
The frame of this Screen is only threeeighths of an inch in thickness by one inch of face, thus giving to each square yard of screen 144 square inches more wire than in the ordinary frame - the weight being less than wooden frames. Every s'rand of the wire forms a double hook in the frame and is firmly secured without the use of tacks. It has received the unqualified approbation of architects and those who have them in use.

## The Anderson Invisible Weather Strip

It consists of the parting-bead (A - see cut) covered on both sides with felt, and strips of coated felt cemented on the top rail of uppersash (B), between the sashes at centre of window (C), and on the bottom rail of lower sash (D).
They render the window, when closed, absolutely dust and weather proof, besides being invisible, and preventing all rattling of windows.
This system of weather-stripping is decidedly better than double windows, very durable, and materially lessons the consumption of fuel.
The atmosphere having no effect whatever upon the cement used, it will never harden, thus preventing all possibility of the goods peeling off.
They are invariably recommended by architects and others who have used them.
The price for fitting an ordinary dwelling house is two dollars per window.

## MANUFACTURED BY <br> Telephone, No. sil.

## WM. G. ANDERSON, 446 Tremont St., Boston.

We can safely recommend the Anderson Screens and Weather Strips as being the best in the market for the purpose intended. We have samples on exhibition at our warerooms and, if interested, will be pleased to have you call and examine same. Prices and testimonials given on application.

    ## POULTRY SUPPLIES.

    ## We Carry the Largest and Most Complete Stock of Poultry Supplies in America and Make Very Low Prices. Write Us When in Want.

    

    ## THE ORIGINAL AND BEST ANIMAK MATTER OR MEAT MEAL. <br> ON TIIE MAREET.

    Since the introduction of Breck's Poultry and Swine Meal to the American public it has found its way into the yards of the most progressive poultry men in the country, because it is superior in every respect to all others.

    A reasonable trial only is necessary to prove its qualities as an egg producer and as a maker of flesh, bone and muscle.

    It is not a new article, but one that has been used for a great many years in Germany, where it is known as "Thieren Mehl," which in English means meat meal or meal made from animal matter. It is perfectly sweet and wholesome, being prepared when the matorials are fresh, and it is guaranteed to keep longer and better than good beef scraps. Its odor is sweet and the flavor more agreeable than any other meat or animal meal on the market, hence it is better relished by poultry and swine, and consequently produces more satisfactory results.

    In addition to the pure meat and bone, we have combined in this preparation some of the most potent agents known for the production of eggs, not by stimulating but rather by preventing disease and promoting general good health, which condition is also necessary for fattening both fowl and swine. This preparation is not only more nutritious and palatable than other animal matter meals, but is entirely free from bad odors, is cheaper than either beef scraps, bone meal, fish meal or similar manufactured articles. Order a trial bag and you will be convinced as to its great merits.

    ## BRECK'S POULTRY AND SWINE MEAL.

    Ioo pound bags
    \$2.25 per bag
    Trial bag (a month's supply for 30 hens) $1.00 \quad$ " Where we have no agent in New England we forward Breck's Poultry and Swine Meal, carriage paid, on receipt of price.

    ## GENERAL SUPPLIES.

    GROUND OYSTER SHELLS. Ioo lb. bags, 65 cents per 100 lbs ; in barrels of 250 lbs., 65 cents per ioo lbs.

    MICA CRYSTAL GRIT. 50 lb . bag, 75 cents; $100 \mathrm{lb} ., \$ \mathrm{I} .00$.
    CRACKED POULTRY BONE. This is about the size of wheat and can be fed mixed with the grain. Per barrel of about 200 lbs ., $\$ 2.50$ per 100 lbs .

    BONE MEAL FOR POULTRY AND CATTLE. This article contains the same properties as Cracked Poultry Bone, but is finer ground. 50 lb . bag, $\$ \mathrm{I} .50$; 100 lb . bag, $\$ 2.50$; per barrel of about 200 lbs ., $\$ 2.50$ per 100 lbs .

    FLOUR OF BONE. This is the hard shinbone reduced to a fine powder, as implied by its name. It is valuable for young chicks whose power of digestion has not matured. 50 lb. bags, $\$ \mathrm{I} .50$; 100 lb . bags, $\$ 2.50$; per barrel of about 200 lbs ., $\$ 2.50$ per 100 lbs .

    GROUND BEEF SCRAPS. 50 llo. bags, \$1.50; 100 lb. bags, \$2.50.

    If Thermometers are wanted by mail, add io cents each extra.

    ## CAPONIZE.

    Poultrymen can double their profits by caponizing their chicks. The operation is very simple - the instructions so full and so explicit that any man, after a careful reading, will be able to perform the operation. The object of Caponizing is to largely increase the weight of fowl, causing them in many cases to grow as large as turkeys and weighing from io to 15 pounds, to make the meat a finer and sweeter flavor and very juicy and tender. They are quieter in disposition. In the more quiet capon the same amount of food goes to make flesh, bone and profit.
    Complete set of Instruments with instructions, by mail
    \$2.50
    In velvet-lined case, by mail
    2.75

    We send book, "Complete Guide for Caponizing," with every set.

    ## II AND 12 COMMERCIAL WHARF, BOSTON, MASS.

    SEND FOR CATALOGUE.

    One application instantly and positively relieves horses and cattle from all annoyance from Green Ileads, the dreaded Texas Hefl Fly, as well as from other Flifs, Gyats and Insects of every description for at least twenty-four hours. It improves the coat of the animal, and abolishes the use of fly-nets. It prevents Thresh and other hoof diseases. It is soothing and healing if applied to sores, and stands unrivaled as a disinfectant. Applied to Cows, its wonderful effect in securing for them perfect rest and a chance to feed in peace quickly manifests itself in their improved appearance and by the increased quantity of milk given. It completely eradicates fleas when applied to dogs. It is also a positive insecticide for plants; in fact, it is the greatest compound of this progressive age. Recommended by thousands using it. One gallon lasts four head of horses or cattle an entire season. Reware of imitations.

    Price of "Tov'gH-0s-Flies:" Quart cans, $\$ 1.00$; half-gallon cans, $\$ 1.75$; gallon cans, $\$ 2.50$; and five-gallon cans, ${ }^{\text {s. }} 000$ per gallon, including cup and brush with each man. Ask your dealer for it. Manufactured only by THE CRESCENT MANUFACTURING COMPANY, FOR

    JOSEPH BRECK \& SONS (Corporation).
    Our second season's experience with "Tough on Flies" has thoroughly proved its wonderful efficacy. We can refer to a large number of our customers who have successfully used this preparation on cows, horses, sheep and other stock, giving the animals perfect ease during fly time.

    We are headquarters for "Tough on Flies" in New England. Circulars mailed on application.
